

# SCHNELLER MEHR ERREICHEN

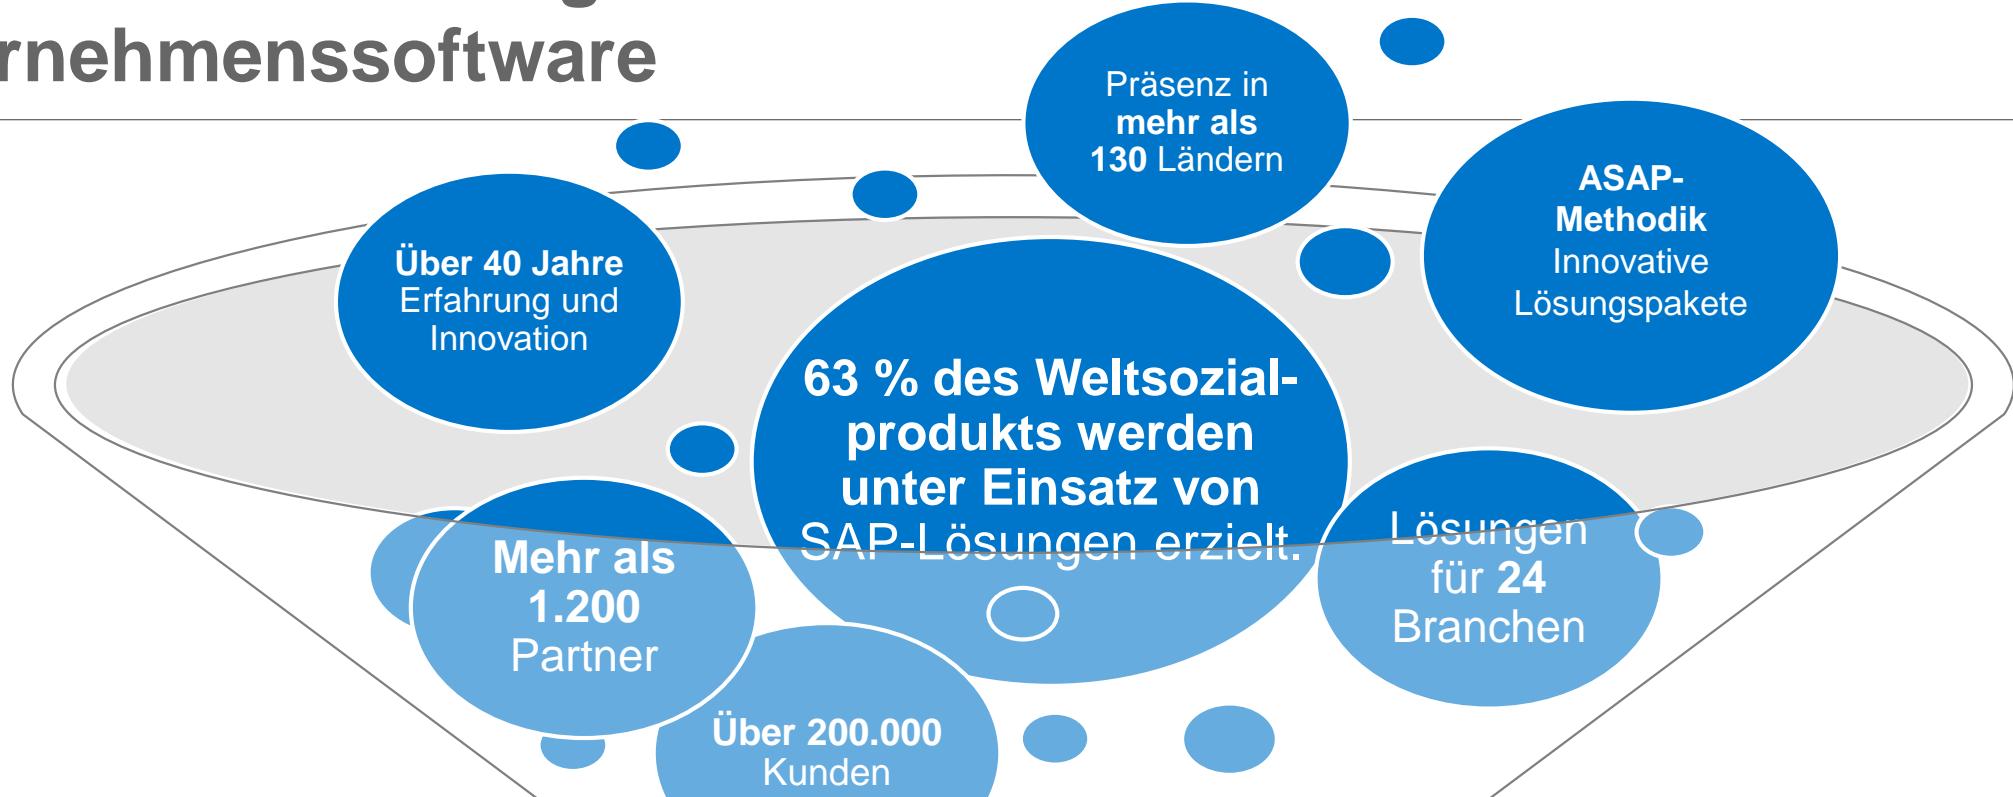

## MIT SAP RAPID DEPLOYMENT SOLUTIONS

# SAP ist der weltweit größte und erfahrenste Anbieter von Unternehmenssoftware

# SAP ist der weltweit größte und erfahrenste Anbieter von Unternehmenssoftware

## Best Practices für Geschäftsprozesse

- Geschäftsprozess-Szenarien
- Anwendungsfälle
- Dynamisches Benchmarking über **Innovationen**, Branchen und Geschäftsbereiche hinweg

## SAP Best Practices

## Best Practices für eine erfolgreiche Implementierung

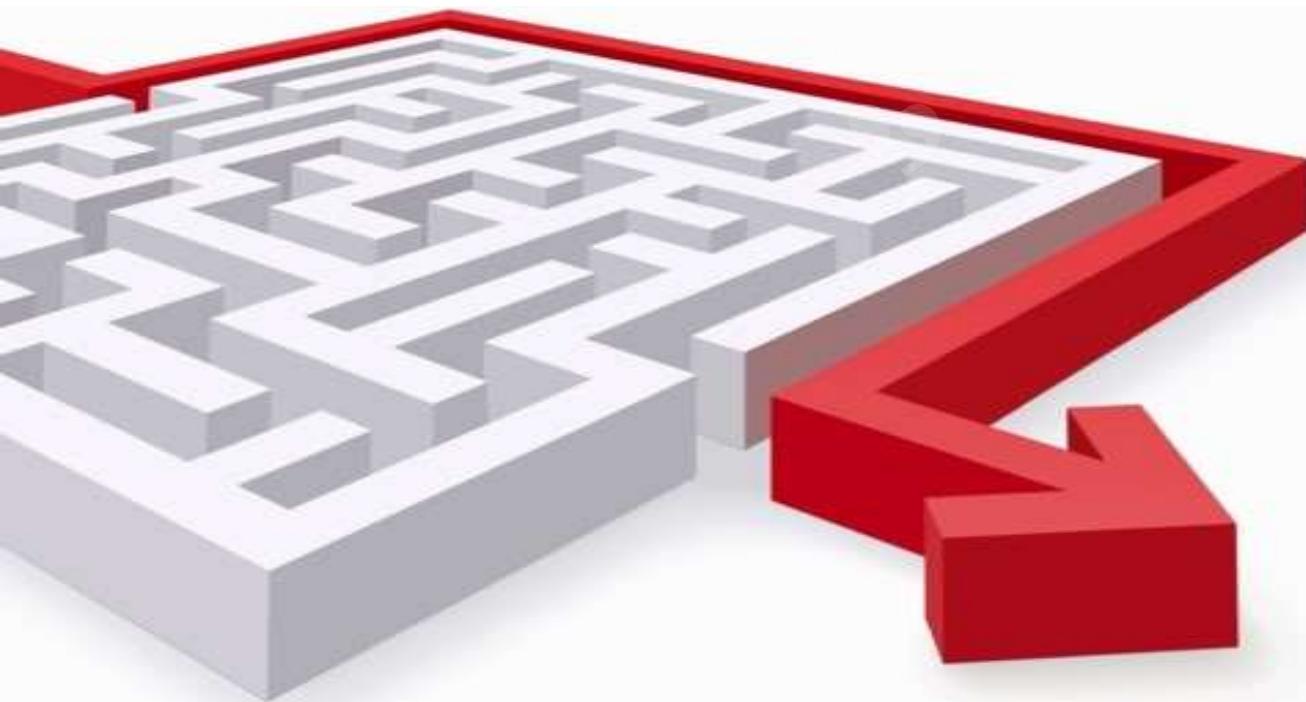

- Schritt-für-Schritt-Leitfaden für die Implementierung
- Cloud-basierte Quick-Start-Unterstützung
- Rapid Deployment Center
- Hybride Implementierung

# SAP Rapid Deployment Solutions:

## Das Beste von SAP in einem Paket

# Das Beste von SAP **schnell** und **einfach** implementieren

IDC, Jan. 2011

## SCHNELL

- schnelle Reaktion auf spezielle Anforderungen
- beschleunigte Wertschöpfung
- rasche Akzeptanz durch Endbenutzer

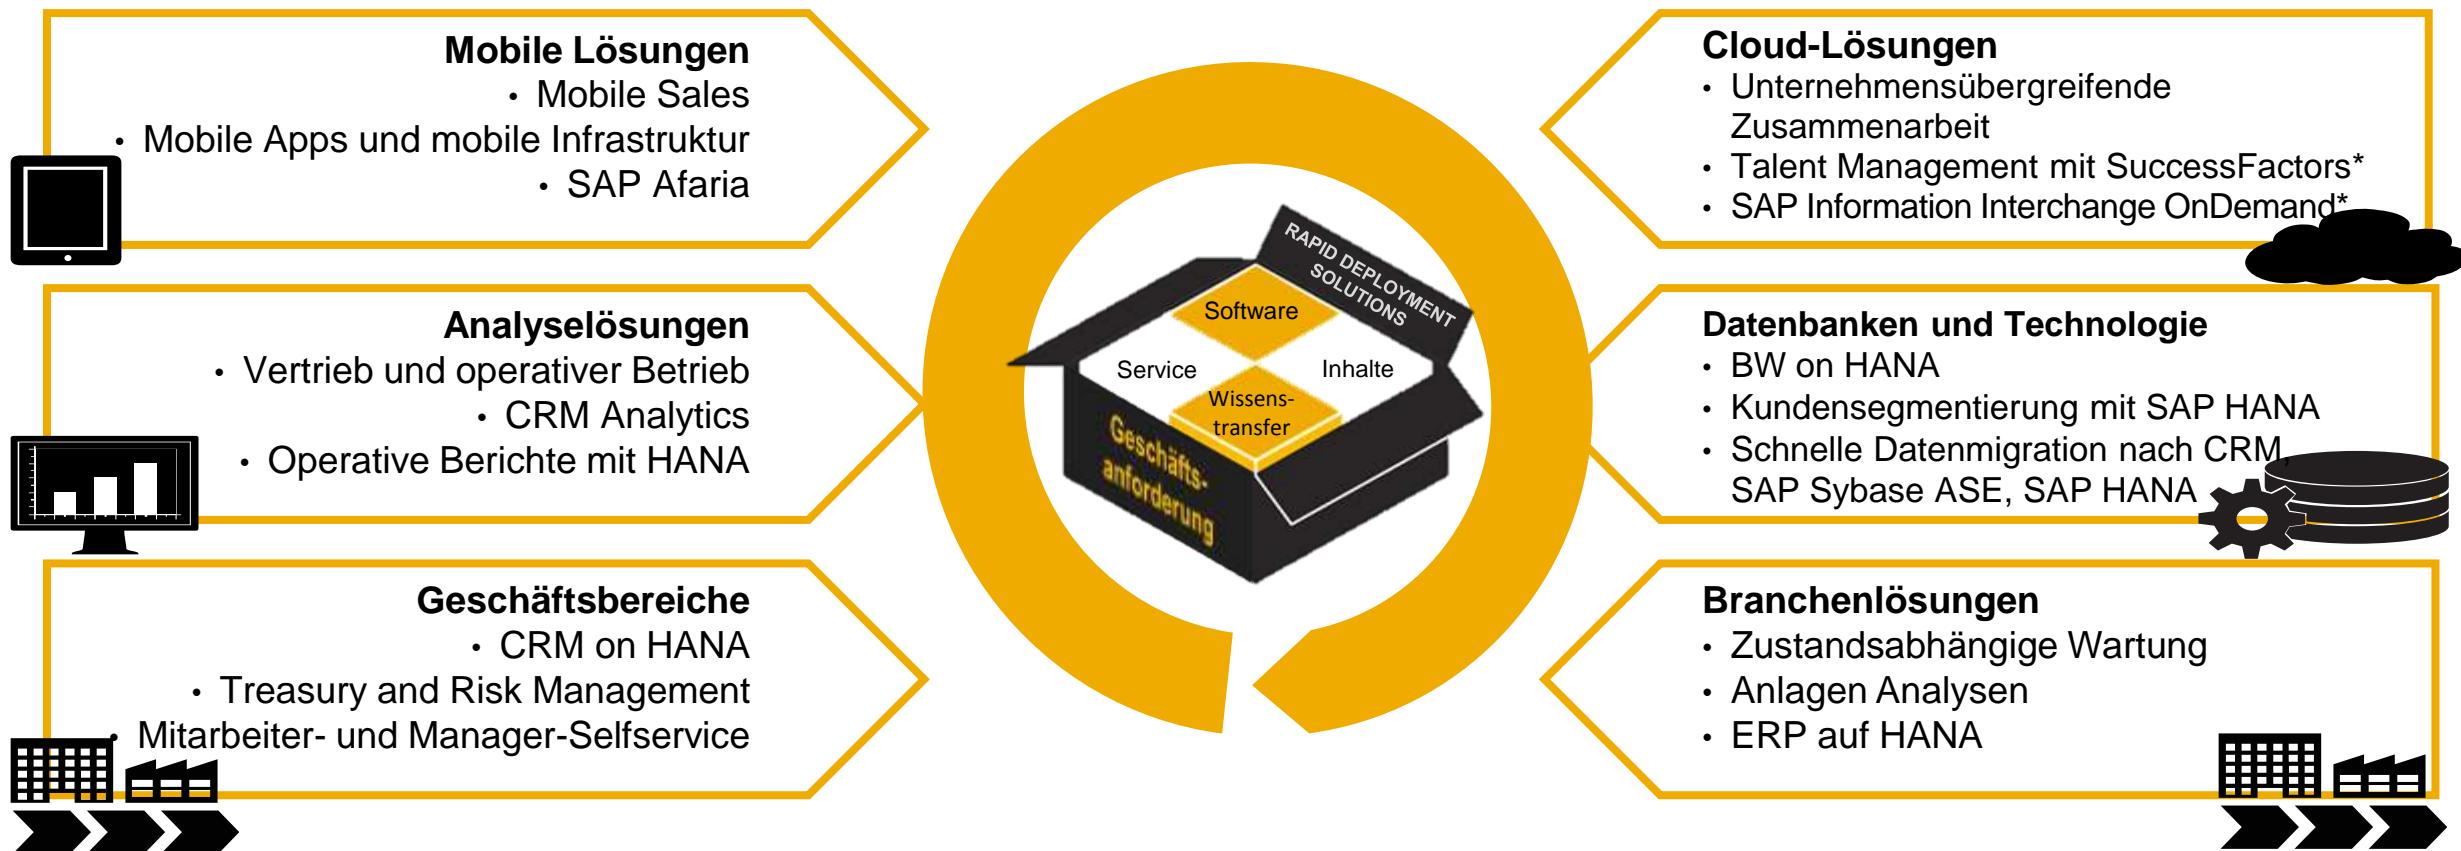

## EINFACH

- ergebnisorientiert
- modular, aber dennoch integriert
- in allen Umgebungen (vor Ort, in der Cloud und mobil)

SAP Rapid Deployment Solutions sind modular aufgebaut und ermöglichen eine schrittweise Einführung anstelle einer „Big Bang“-Implementierung.

# Ein umfassendes Portfolio von mehr als 150 Schnellstartpaketen

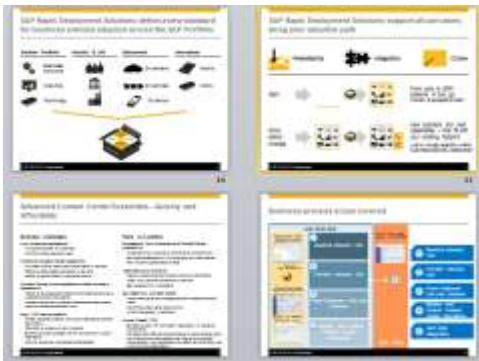

Sämtliche Lösungen dieses SAP-Portfolios sind **modular aufgebaut, vorkonfiguriert und vorintegriert**

Finden Sie Ihre Lösung unter [sap.de/rds](http://sap.de/rds)

# Lieferung von RDS

**Solution Details Presentation:** Introduction to the RDS or service aimed at the customer

**Statement of Work:** Detailed scope, responsibilities and deliverables. Check functional fit with this document.

**Work Breakdown Structure (WBS):** SAP phases, tasks, person days and roles

**Qualification Questionnaire\***: questions required to qualify an opportunity

#	Question (questions to evaluate if RDS answers customer business pain points)	Answer	Expected Answer for Prospect to be qualified
1.	Do you need to manage building, properties and/or rental spaces?	Select Here	Yes
2.	Do you need better property portfolio insight?	Select Here	Yes
3.	Do you have sustainability goals and measurements in building operations?	Select Here	Yes
4.	Do you require better analysis of your building, real estate or facility portfolio performance?	Select Here	Yes
5.	Do you need to make better investment decisions?	Select Here	Yes
6.	Do you keep construction projects on plan?	Select Here	Yes
7.	Do you need to do more efficient leasing administration?	Select Here	Yes
8.	Do you want to improve corporate workspace utilization?	Select Here	Yes
9.	Is it difficult for your organization to comply to a variety of legal standards?	Select Here	Yes

\* You may also need the Scoping Questionnaire when the detailed bid is prepared or if the customer requires more detail

SAP ERP Rapid-Deployment Solution for the Employee and Manager Portal  
**STEP-BY-STEP GUIDE**

## Discover: Qualify Prospect

In this activity, the SAP sales representative gains a better understanding of the prospect's requirements and expectations, and helps the prospect to decide whether this rapid-deployment solution is suitable for them.

The SAP sales representative does the following:

1. Guides the prospect through the qualification questionnaire; if the prospect has not already answered it
2. If the solution is suitable, qualifies the prospect as an opportunity and continues to the next step
3. If the solution is not suitable, discusses with the prospect if other SAP products or services are of interest; this ends the interaction relating to this rapid-deployment solution.

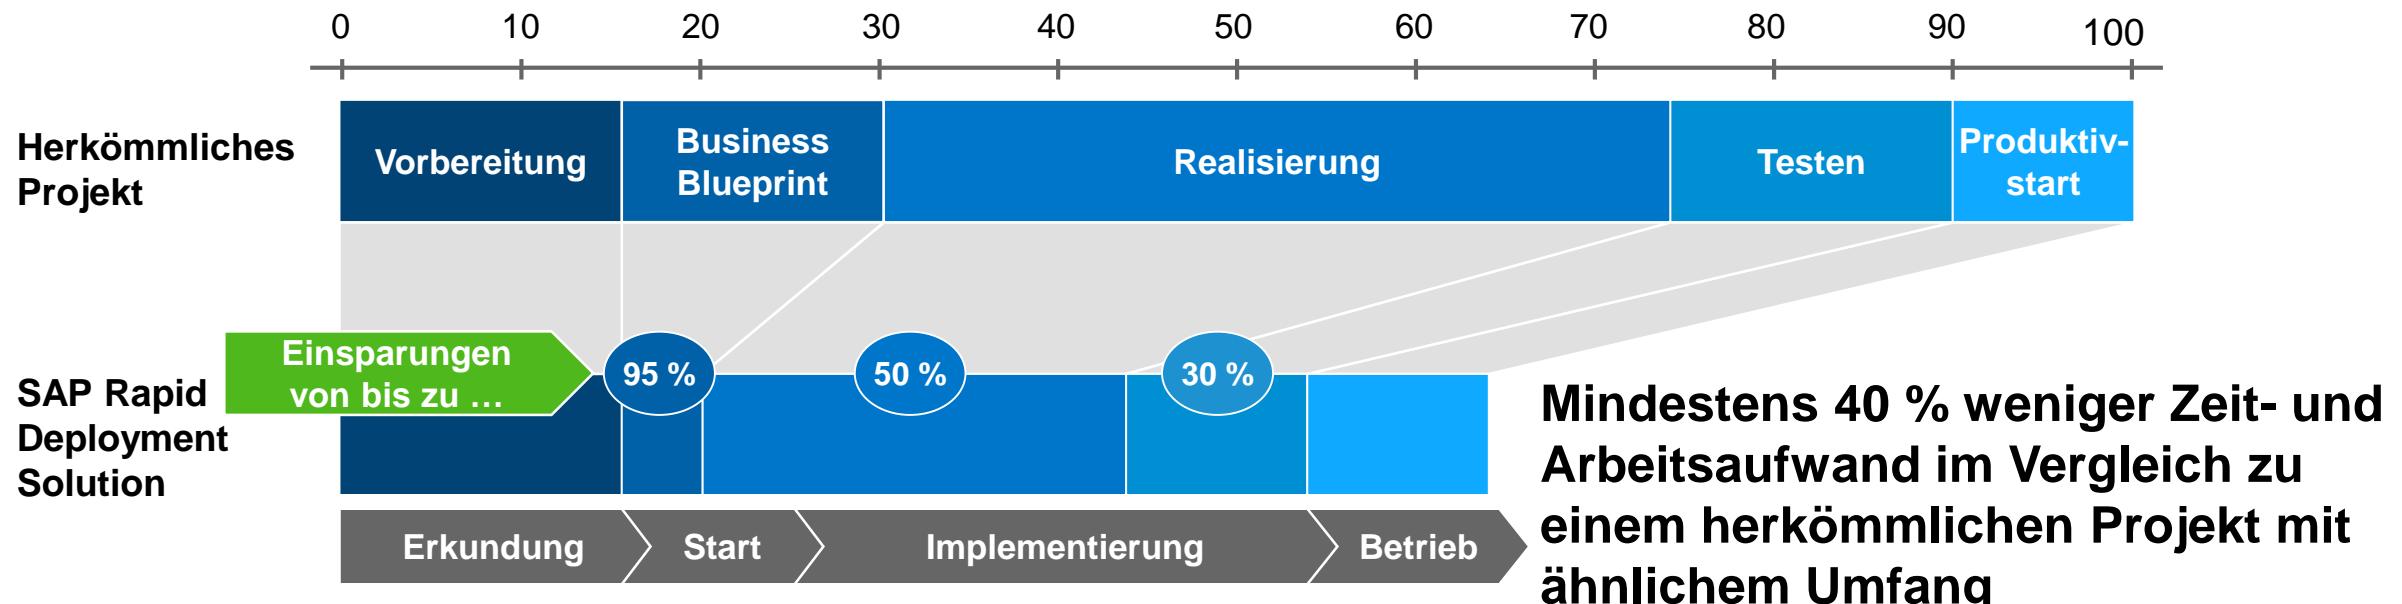

## Result

It is known if the solution is suitable for the prospect.

- ACCELERATORS**
- Scoping questionnaire
  - Software requirements

# Einführungsmethodik für SAP Rapid Deployment Solutions

## Best Practices für schnellere Einführung und frühere Betriebsbereitschaft

Tobias Ortwein, PAC, Sept. 2012

Mit SAP Rapid Deployment Solutions lässt sich der Implementierungsaufwand im Vergleich zu einem herkömmlichen Projekt erheblich verringern, da die im Lösungsumfang enthaltenen grundlegenden Prozesse auf sorgfältig erarbeiteten Best Practices basieren, die wesentlich effizienter als vom Kunden definierte Prozesse sind.

## Applications

### 10 SAP Treasury & Risk Management

Core processes in T&R Mgmt, e.g.

- Money Market
- Interest Swaps
- Foreign Exchange
- Integrated with the SAP ERP core

### 8 ES-SAP Credit Mgmt (Q3)

Implementing a proactive lending process to facilitate standardized, assessments and system-aided monitoring of default

### 5 SAP Dispute & Collections Mgmt

- Manual and automated creation of dispute cases and workflow processes
- Setup of collection strategies , daily worklist, evaluation of

### 4 SAP Shared Service Framework for Finance

- Professional interaction of shared service organization interact with internal and external customers
- Service Request Creation from ERP or via CRM

### 9 Financial Close & Disclosure Mgmt

Includes the Financial Close starter kit for IFRS includes features to help customers transition to IFRS.

## Internal Project Staffing and Cost Management

- Forecasting, staffing and costing of employees against internal orders or projects
- Full transparency into planned and actual costs

### 17 SAP ERP RDS for FI/CO

Baseline Configuration for FI/CO + Ops Planning + Reporting

### 5 BPC Financial Planning for New G/L

Accelerated implementation of SAP's BPC application. It will leverage the data model in the G/L in SAP software to feed financial plans and statements in BPC Netweaver version.

### GRC Access Control Accelerated Implementation

Integrated approach to visualize and proactively manage user access. The application equips businesses to prevent access risk, reduce the cost and effort of access risk management, and minimize the time of compliance.

## Mobility

### 8 Mobility Apps and Infrastructure

Access ECC data on the go through Apps using SAP's Mobile Platform

### SAP Productivity Apps

- SAP Travel Receipt Capture | SAP Travel Expense Approvals
- SAP Payment Approvals | SAP Access Approvals

## Technology & Database

### 10+ Data Migration for ERP

Migrate legacy data to SAP ERP quickly, affordably and with low-risk

### Accelerator for Profitability Analysis

Accelerate your cost allocations with HANA

### ERP Accelerated Finance & Controlling

Use HANA to report and accelerate GL, Material Ledger reports

### ERP Operational reporting with HANA

Real-time decisions based on real-time sales reports from ECC system

## Analytics

### 8 Net Margin Analysis

Provide insight into net margin allowing our customers to focus on high-value customers with the optimal product mixes to improve margin.

### GRC -Global Trade Services SPL Screening

Improve response times for key GTS Sanctioned Party List monitoring reports

## Cloud

### Cloud-based Quick-start for RDS

Implement in the cloud and shift on premise for production

# RDS Portfolio by LoB: Manufacturing, PLM & Visual Enterprise

x

Implementation time in weeks

## Applications

### 15 RDS for Portfolio Monitoring

Aligns projects with Portfolio strategy and monitors of running projects on a Portfolio level

### 5-8 RDS for PLM for Discrete or Process Industries (Foundation)

SAP PLM WebUI for Discrete or Process Industries

### 12 RDS IT Portfolio and Project Management

Fosters efficient management of projects and resources for IT

### 8 SAP Visual Enterprise

visualizes product knowledge for multiple purpose including marketing and service

### 6-12 RDS for PLM Product Structure Sync

Synchronizes engineering product structures with manufacturing bills of materials

### 12 RDS for Manufacturing Execution

Power your shop floor with SAP ME for Production and shop floor Execution and change execution

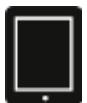

### 12 RDS for MII Batch Manufacturing

batch manufacturing integrated with your SAP ERP

### 26 RDS Manufacturing for SAP ERP

Increases productivity of manufacturing operations

## Mobility

### 8 Mobility Apps and Infrastructure

Access ECC data on the go through Apps using SAP's Mobile Platform

### SAP Productivity Apps

Material Availability  
Quality Issue  
EHS Safety

### Service Parts Planning (SPP)

SPP provides planning functions specific to service parts and transparency throughout the supply chain

### 9 SAP for Real Estate

Best practice configuration for  

- Lease and Space Mgmt
- Investment and Construction Mgmt
- Maintenance and Repair Mgmt

## Technology & Database

### 10+ Data Migration for ERP

Migrate legacy data to SAP ERP quickly, affordably and with low-risk

### ERP Operational reporting with HAN

Real-time decisions based on real-time sales reports from ECC system

## Analytics

### 8 SAP Portfolio and Project Management for Portfolio analysis

gain visibility into the performance of your Portfolio

### RDS for Asset Analytics

supports customers in making asset management decisions and plans to help maximize their return on assets.

## Cloud

### Cloud-based Quick-start for RDS

Implement in the cloud and shift on premise for production

# RDS Portfolio: *Supply Chain Planning*

● Project Duration (weeks) \*  
varies depending on scope

**NEW** = Q3 2012 Release

## Applications

12

### RDS for Demand Planning Analytics

sophisticated demand planning capabilities extending SAP ERP

20

### RDS for Service Parts Planning

planning functions specific to service parts for a transparent supply chain

10

### RDS for Advanced Production Scheduler

Extends existing MRP in SAP ERP with sophisticated detailed scheduling in SAP APO

10

### RDS for SNC Supplier Collaboration **NEW**

synchronize the information flow with your suppliers featuring purchase order processing and SMI

20

### RDS for SNC Customer Collaboration

replenishing products at customer's location using advanced VMI functionality

## Mobility

### Data Migration for ERP **NEW**

Migrate legacy data to SAP ERP quickly, affordably and with low-risk

### ERP Operational reporting with HANA

Real-time decisions based on real-time sales reports from ECC system

## Analytics

16

### RDS for Sales & Operations Planning

Fixed scope implementation to generate and iterate a demand plan with the supply plan

12

### RDS for Supply Chain Performance Mgmt (SCPM)

Monitor supply chain metrics, including correlation between them and their dependencies

## Cloud

### Cloud-based Quick-start for RDS

Implement in the cloud and shift on premise for production

# RDS Portfolio: *Supply Chain Execution*

Project Duration (weeks) \*  
varies depending on scope

**NEW** = Q3 2012 Release

## Applications

4-12

### RDS for Global Available-to-Promise

preconfigured software utilizing best practices for rapid delivery of global ATP

11

### RDS for Transportation Mgmt Outbound Planning

reduce transportation cost while improving customer satisfaction thru order consolidation, optimized routing, scheduling and carrier selection

16

### Lean RDS for EWM

Setup SAP EWM implementing basic Inbound, outbound & other internal processes

11

### RDS for Transportation Mgmt Tendering

select and collaborate with carriers through predefined rules, in line with company goals, external capacities and transportation requirements

17

### EWM Migration from WM

Setup EWM based on your existing ERP WM implementation

10

### RDS for Transportation Mgmt Ocean Carrier Booking

Plan, execute, and monitor ocean shipments, including container tracking

## Mobility

8

### Mobility Apps and Infrastructure

Access ECC data on the go through Apps using SAP's Mobile Platform

### SAP Productivity Apps

SAP Transport Notification and Status  
SAP Transport Tendering

### Data Migration for ERP

**NEW**

Migrate legacy data to SAP ERP quickly, affordably and with low-risk

### ERP Operational reporting with HANA

Real-time decisions based on real-time sales reports from ECC system

## Analytics

4

### RDS for Order Tracking and Exception Management

Extensive tracking & tracing functionality allows process monitoring, automated exception resolution as well as proactive alerting

12

### RDS for Supply Chain Performance Mgmt (SCPM)

Monitor supply chain metrics, including correlation between them and their dependencies

## Cloud

### Cloud-based Quick-start for RDS

Implement in the cloud and shift on premise for production

# RDS Portfolio by LoB: CRM

## RDS + Engineered Services

x Implementation time in weeks

### Applications

- 10-14 CRM Sales Service and Marketing**  
CRM Sales Service and Marketing

### 11 CRM Service Management

Preconfigured CRM solution for field service as well as complaints and returns mgmt

### 8-10 Webchannel for B2B Sales

B2B predefined Order Management Best Practice

### 7+ Business Communication Management

Call Center Solution integrated with SAP CRM

### Mobility

- 8 SAP CRM RDS for Mobile Sales**  
Equip your sales force with SAP CRM On their mobile device

### 8 Mobility Apps and Infrastructure

Access ECC data on the go through Apps using SAP's Mobile Platform

### SAP Productivity Apps for Sales

Sales Order Notification | Customer and Contacts  
Material Availability | Sales Order Status

### Technology & Database

- 10+ Data Migration for ERP**  
Migrate legacy data to SAP ERP quickly, affordably and with low-risk

- Sentiment Intelligence**  
Combine structured data with unstructured data to gain insight into market trends & perception

### 5 Customer Segmentation w/ HANA

Accelerate segmentation of high data volume to quickly create target groups

### 5+ Sales Pipeline Analysis HANA

Real-time insight into opportunity, quote and order data- relieve CRM of heavy reporting jobs

### 8+ CRM Analytics w HANA

Insight from big-data in BW running on HANA

### 6 Operational reporting w HANA

Sales Reports/Dashboard  
Real-time decisions based on real-time sales reports from ECC system

### Analytics

- 15 CRM Analytics**  
Analyze Sales data from SAP CRM via dashboards and easy reports.

### Net Margin Analysis

Provide insight into net margin and to help with target high-value customers with the optimal product mixes to improve margin.

### Cloud

- 4 CRM Business Collaboration**  
Close deals by collaborating with SAP CRM & Streamworks

### Cloud-based Quick-start for RDS

Implement in the cloud and shift on premise for production

# Verschiedene Möglichkeiten, SAP Lösungen einzuführen

## Start

Schnelle Einführungen durch **Basisbausteine**, vor allem im ERP Umfeld

z.B.: ERP on HANA, CRM

## Innovate

Schnelle Einführungen unserer **Innovationen**, wie Hana, Mobile und andere zukünftige Lösungen, um dann neue Geschäftsmodelle zu implementieren

z.B.: Ops Rep., Fin Acc. CO-PA Acc.

## Grow

Gezielte schnelle und kostengünstige Erweiterungen

z.B.: Solvency II, eWM, ESS-MSS

## Complex

Komplexe Anforderungen durch mehrere RDS abdecken

→ RDS als Lieferbausteine

# RDS folgen der Assemble-to-Order Logik

## Design-Based

Assembled & Specially Designed  
Use Engineered Services as accelerators in a project with a full Blueprint

"Take whatever helps"

## Assemble-to-Order Agile Prototyping

Assembled Building Blocks  
Combine Engineered Services into a larger project that addresses dependencies, gaps and integration

"Glue together whole Services" \*\*

## Assemble-to-Order Delta Scoping

## Industrialized

Standard Building Blocks  
Execute individual Engineered Service

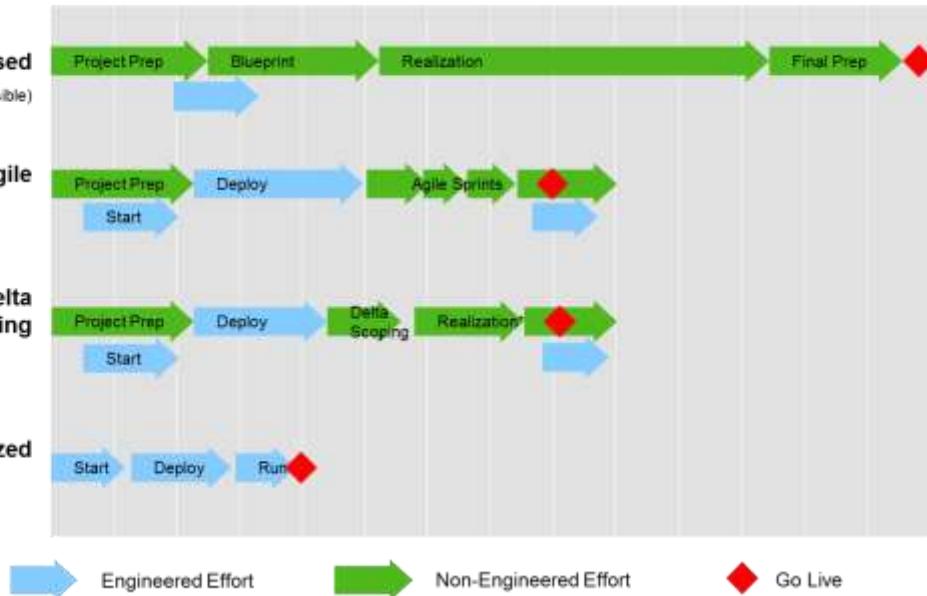

"Take a Service or leave it" \*

## Design-Based (Agile Approach Possible)

## A2O Agile

## A2O Delta Scoping

## Industrialized

# SAP BusinessObjects Asset Analytics Rapid-Deployment Solution

## Übersicht

# Asset Analytics: Aggregate information – integrated and interactive dashboards, scorecards and reports

# Asset Analytics: Improve and streamline your business

## Minimal Downtime

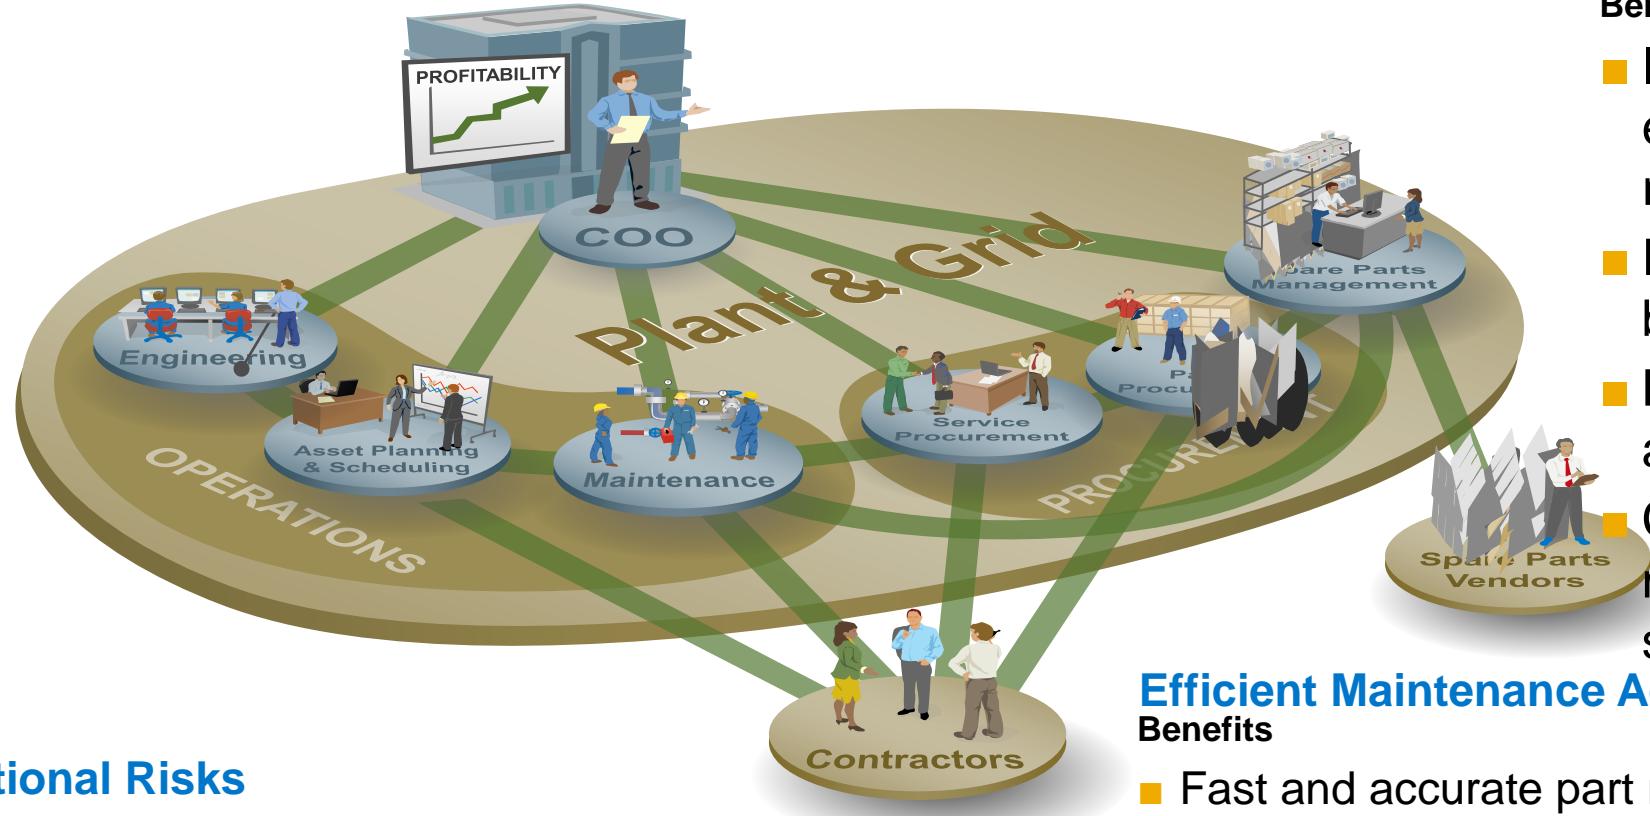

### Benefits

- Assets available when needed
- Resource hours and material requirements happen as planned
- Reduced MTBF
- Reduce work backlog

## Reduce Operational Risks

### Benefits

- Reduce regulatory non-compliance

## Keep Assets Profitable

### Benefits

- Increase equipment reliability
- Reduced work backlog
- Better utilization of assets
- Control maintenance spend

## Efficient Maintenance Activity

### Benefits

- Fast and accurate part replenishment process.
- Reduction of capital tied up in spare parts inventory
- Visibility of current spares list

# SAP® Multiresource Scheduling Rapid-Deployment Solution

Überblick

# SAP Multiresource Scheduling rapid-deployment solution

## Cross-Industry and three Core Scenarios

### Project Staffing

Professional services providers can use SAP MRS to match demand against the available supply of consultants.

The solution aggregates data from multiple sources, helping you identify properly qualified personnel, assign the right consultants to projects, and meet service demand. In addition, planners gain an overview of client requests available resources, and open projects – enhancing visibility and transparency.

### Maintenance

Organizations that provide industrial plant maintenance services must balance the need for specialized technology services with the availability of uniquely qualified technicians. SAP MRS supports the overall operations and maintenance strategy. Superior maintenance of valuable assets reduces mean time between equipment breakdowns, enhances production uptime, and improves on-time delivery.

### Field Services

SAP MRS provides your field services organization an end-to-end integrated SAP solution for planning and scheduling as well as key integration to your mobile devices including Geographical Information systems data.

The solution enables scheduling decisions that will ultimately lead to better quality of service, increased profitability and revenue. An efficient and high performing service organization is key to expanding the business.

# SAP Multiresource Scheduling rapid-deployment solution

## Scope Overview

### 1 Project Staffing

- Integration with SAP Project and Portfolio Management
- Integration with SAP ERP Project System

### 2 Plant Maintenance

- Integration with SAP ERP Plant Maintenance
- Planning and Scheduling on Work center level or human resource level

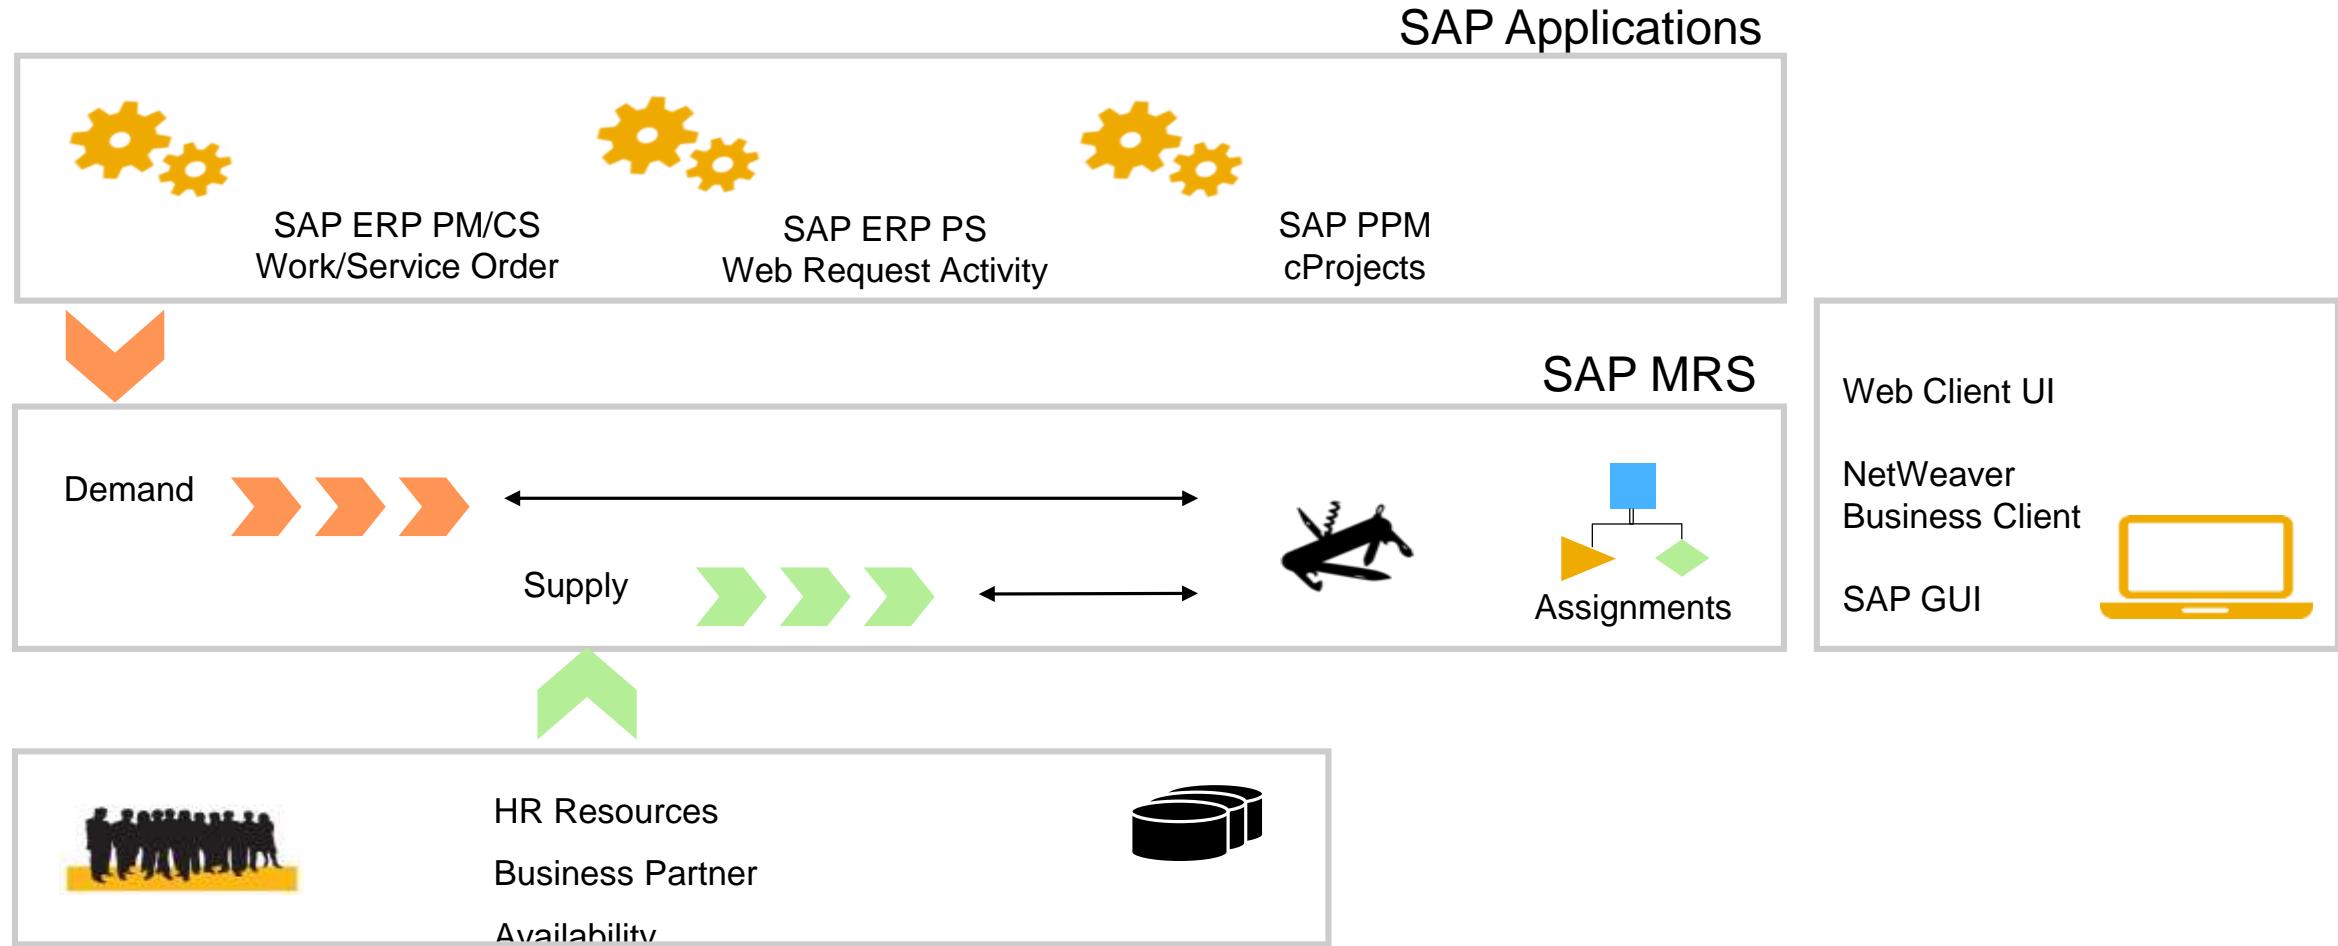

### 3 Field Services

- Integration with SAP ERP Customer Service
- Planning and dispatching of resource based on requirements
